

Introduction to Analysis I (Fall 2025)

Options for Making Up (Bad) Midterm Scores

The default weights for the midterm and final exam scores are 20% each of the total score for the class, as specified in the syllabus. But if you ended up with a not so desirable score in the midterm exam, here is an offer using which you could make up most, if not all, of the damage.

- ✓ If you get a score of at least 87 (out of 100) in the final exam, your final exam score will replace your midterm exam score.
- ✓ If your final exam score is at least 77 but less than 87 (out of 100), the weight for your final exam score will increase to 30% and that for your midterm exam will decrease to 10% of the total score for the class.

Here are a couple points to note regarding possible changes in the weights of the exam scores.

- ★ A higher score in the midterm exam will never be replaced by a lower score in the final exam.
- ★ Similarly, a lower score in the final exam will not be replaced by a higher midterm exam score.

In other words, a good performance in the midterm will not go wasted. At the same time, this offer is not a license to slack off now after a good performance in the midterm :-).

So, study hard, use my help, and you'll do just fine. All the best!
